

# Solar Cell Operation, Performance and Design Rules

## Solar Cell Operation

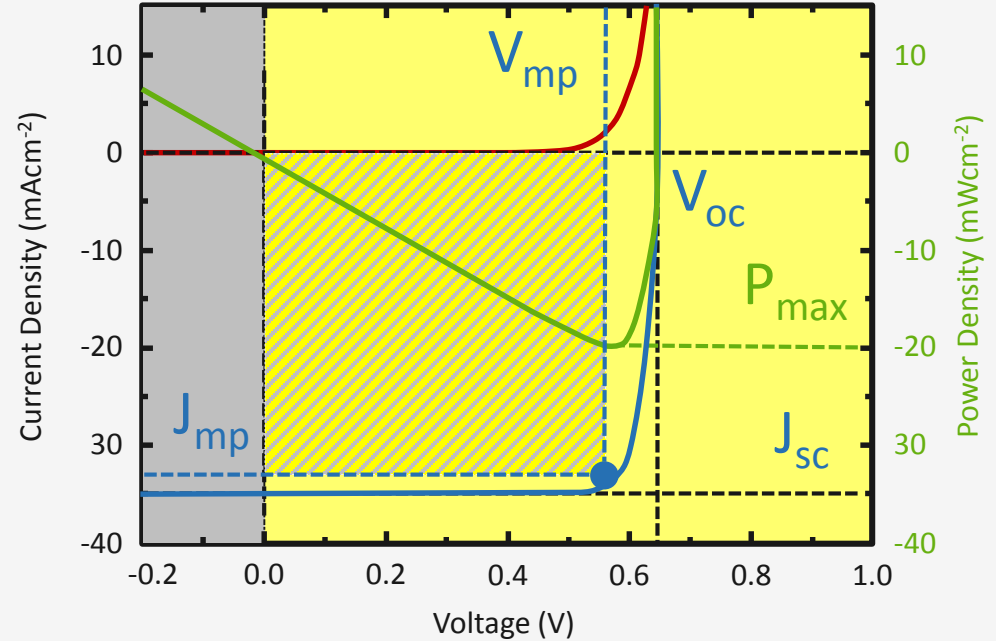

*Week 3.1*

Arno Smets

# Equivalent Circuit

# JV-Curve

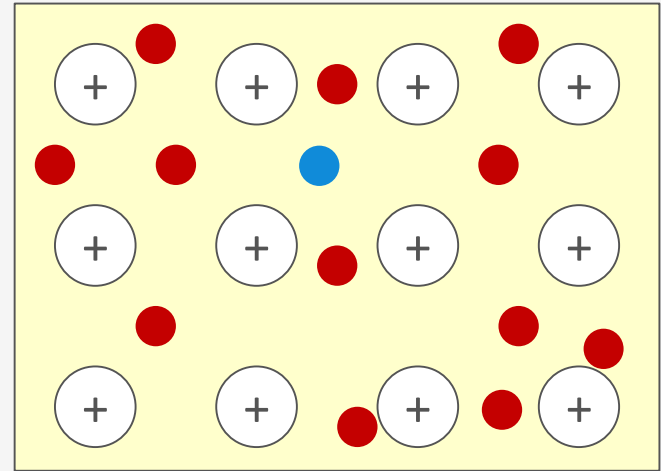

Maximum power point

# pn Junction

p-doped

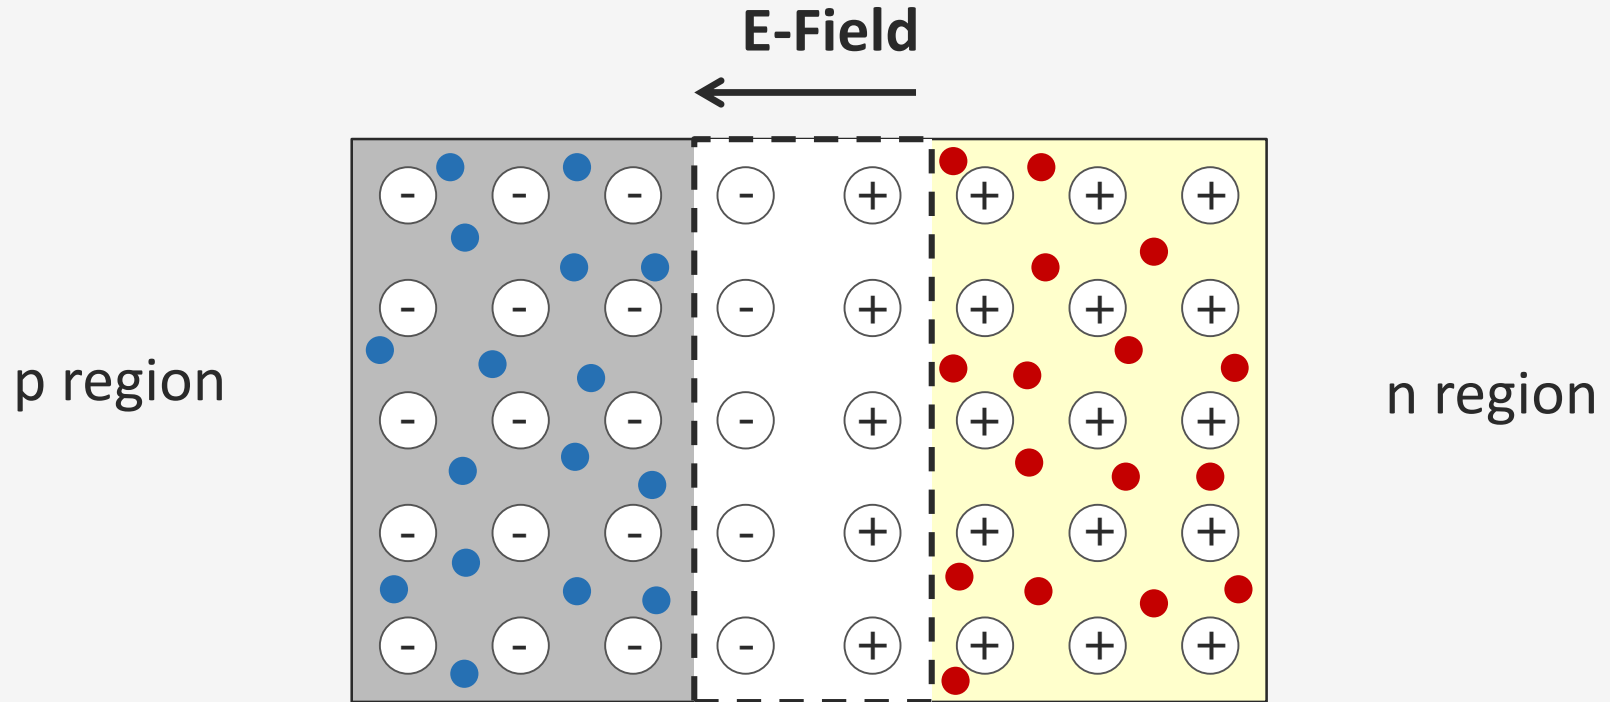

n-doped

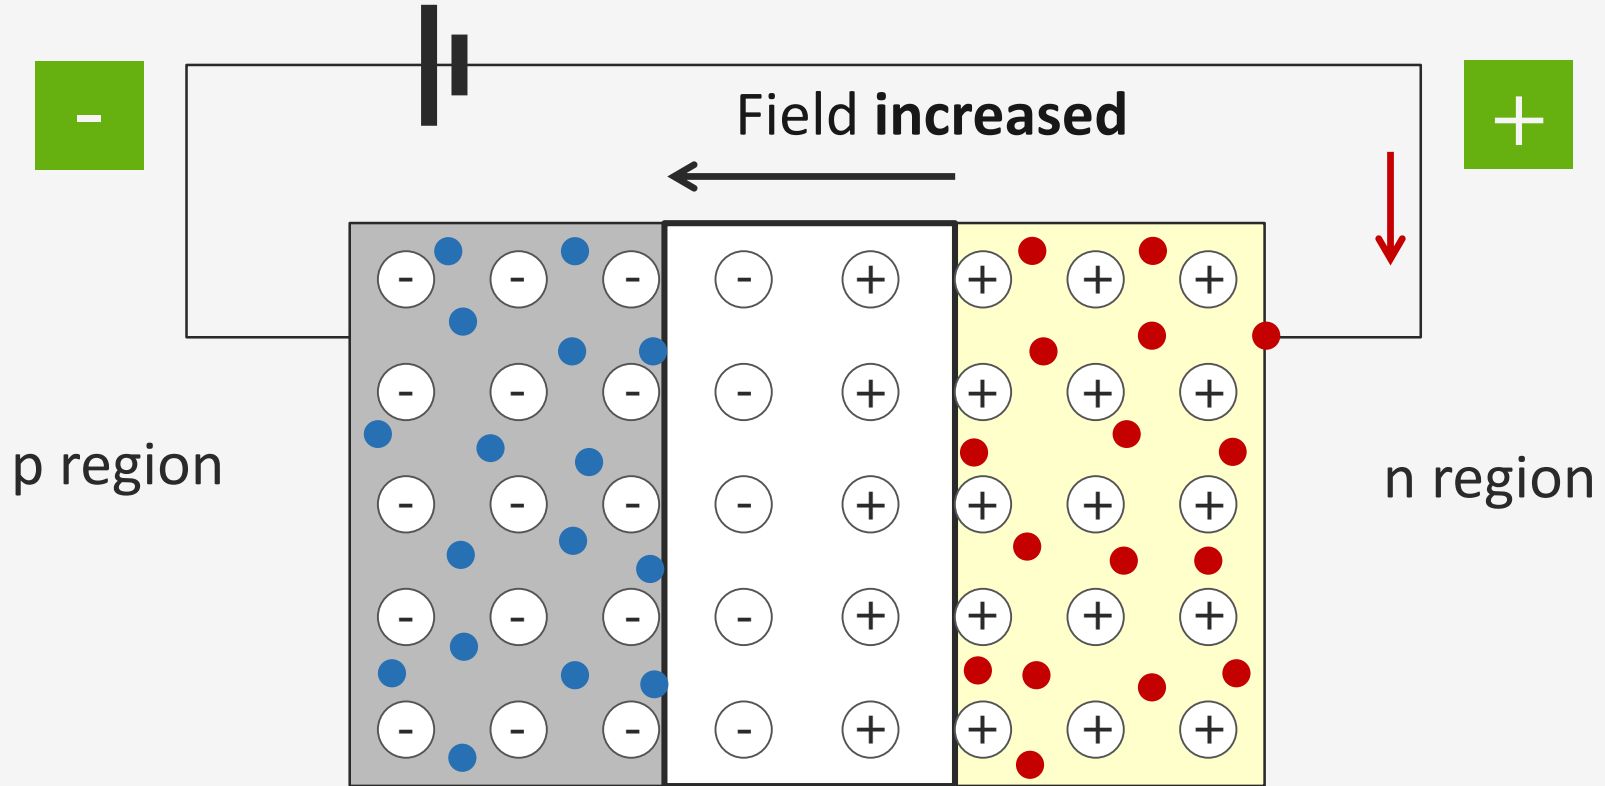

# Transport of Charge Carriers

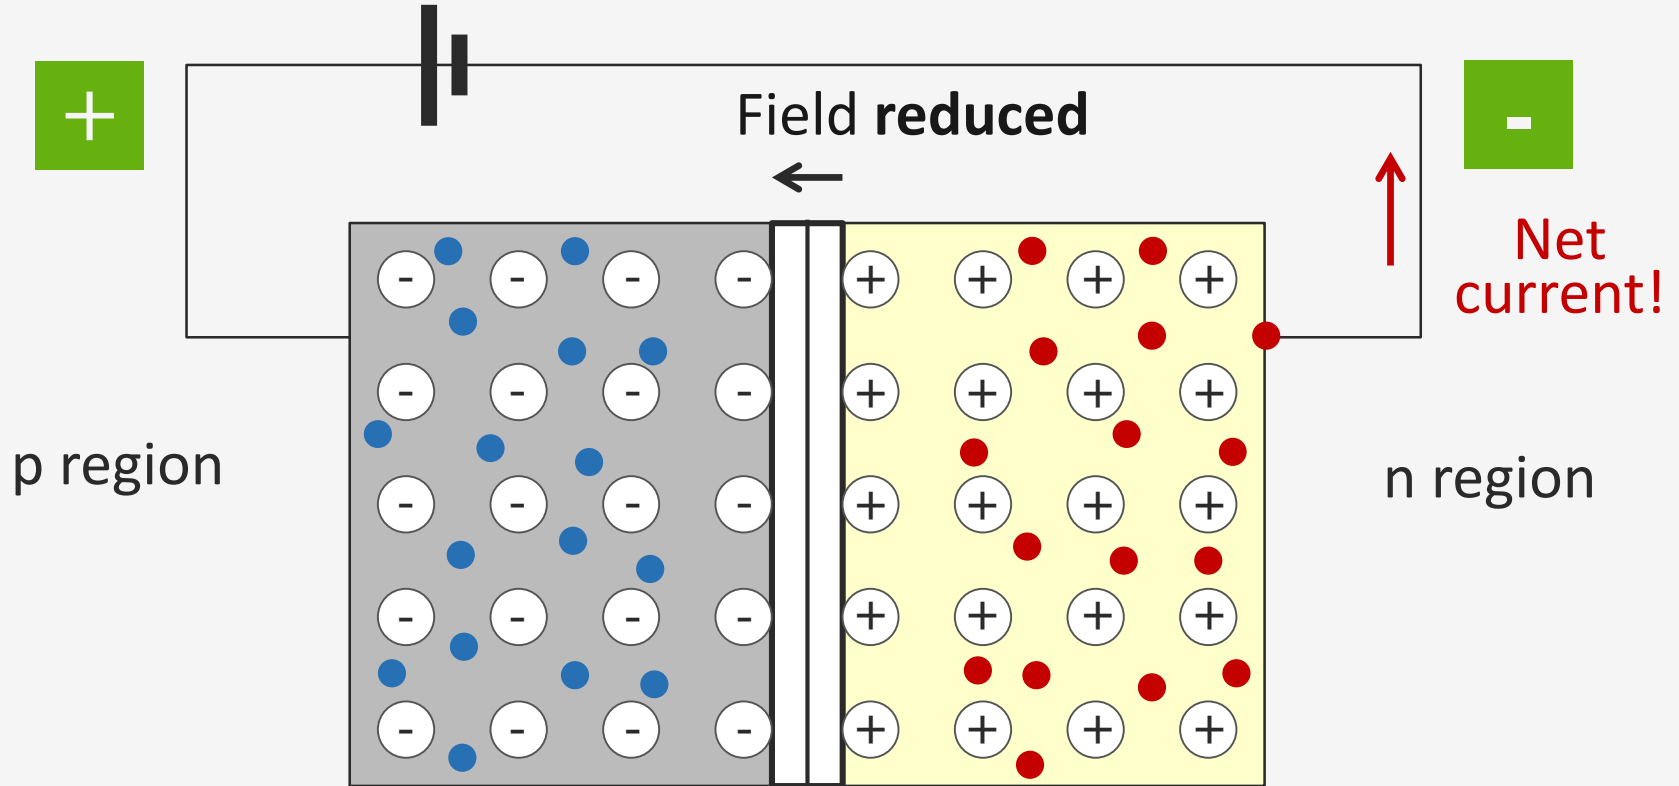

# pn Junction

# pn Junction - *Reverse bias in the dark*

# pn Junction - *Forward bias in the dark*

# pn Junction – *Under illumination*

# Equivalent circuit of solar cell

*The dark current of the p-n junction*

# Equivalent circuit of solar cell - *Reverse bias*

*The dark current of the p-n junction*

*Extremely  
small net  
current!*

# Equivalent circuit of solar cell - *Forward bias*

*The dark current of the p-n junction*

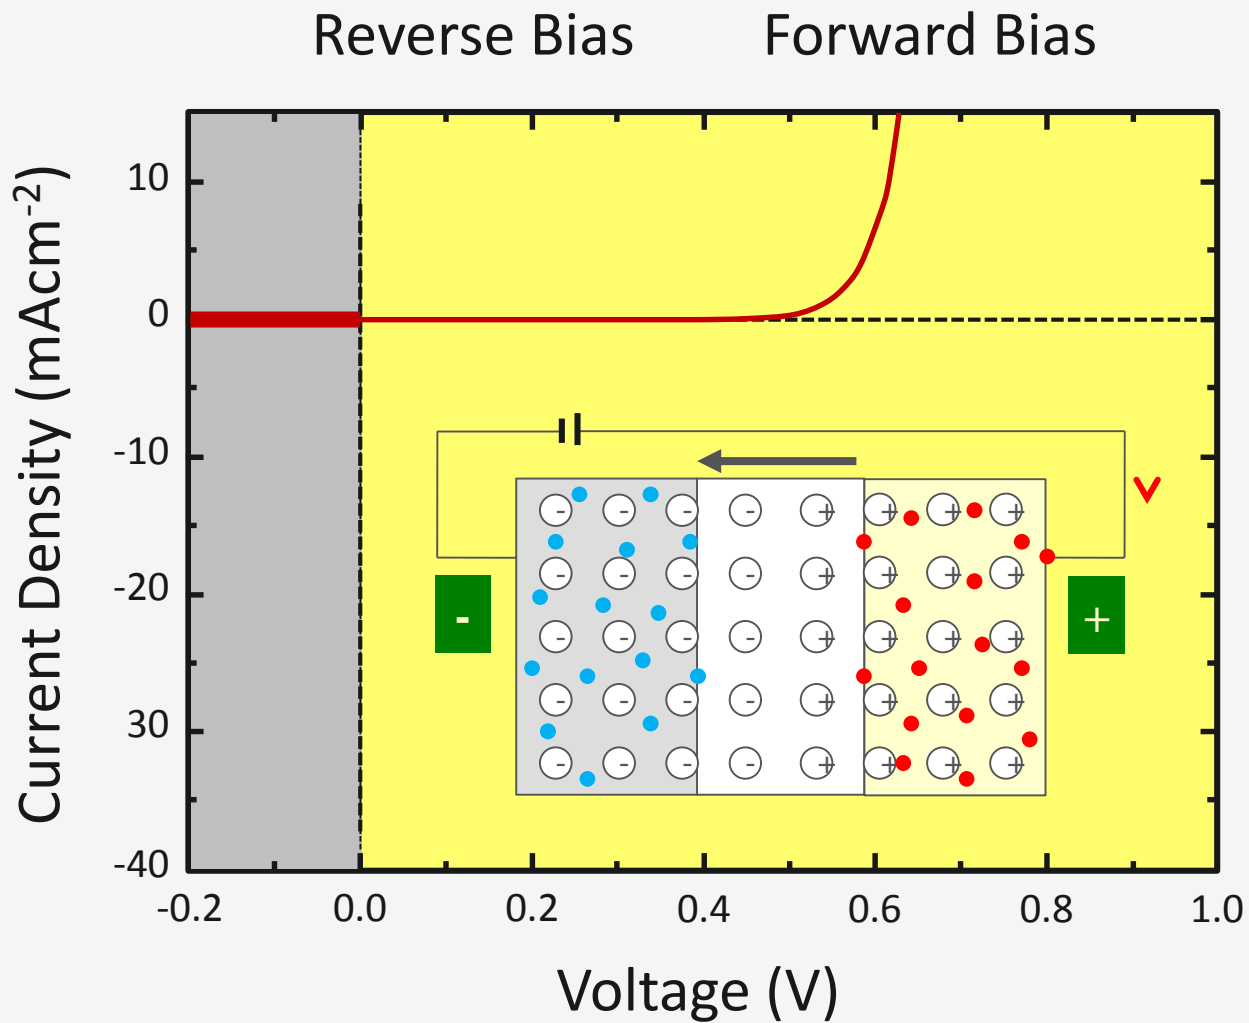

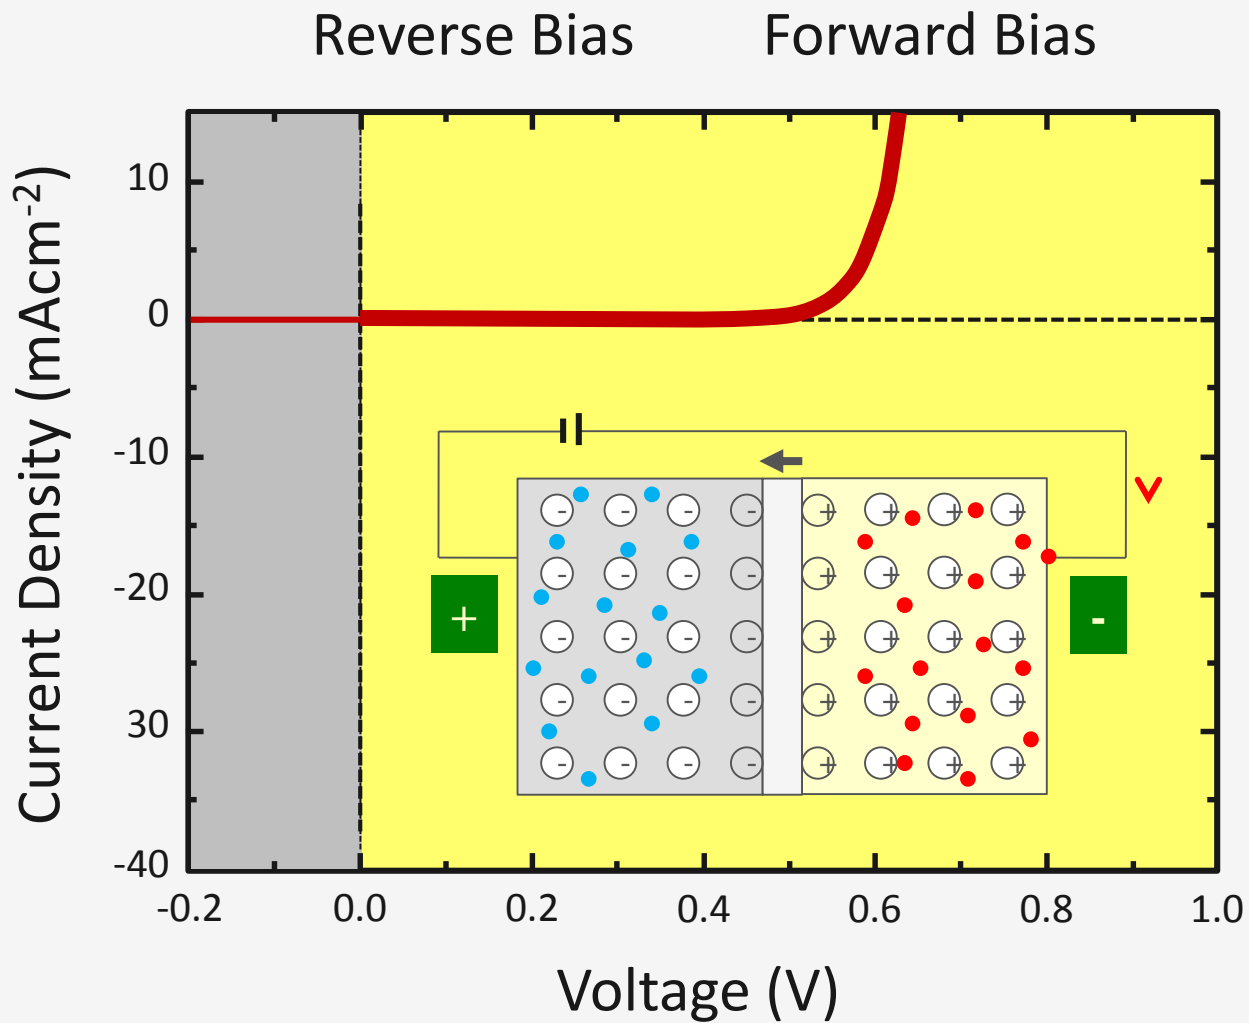

*Extremely  
small net  
current!*

Reverse Bias

Forward Bias

Reverse Bias

Forward Bias

Reverse Bias

Forward Bias

Reverse Bias

Forward Bias

Reverse Bias

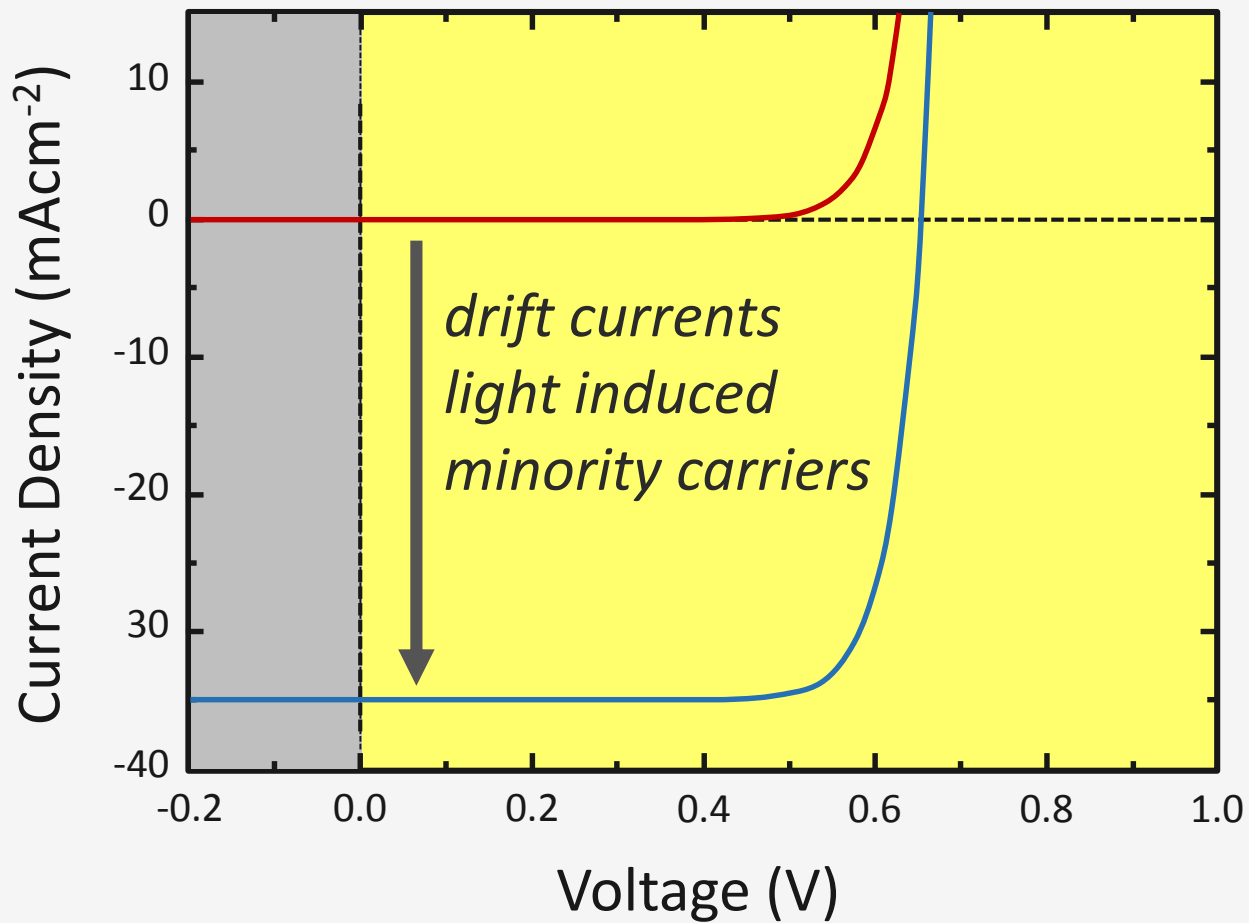

Forward Bias

# Equivalent circuit of solar cell

*The illuminated ideal p-n junction*

$$J = \frac{I}{A}$$
