# Shockley-Queisser limit

# Limitations

Single bang gap energy

# Limitations

Single band gap energy

1-Sun irradiance

# Limitations

Single band gap energy

1-Sun irradiance

One  $e-h$  pair per photon

# Limitations

Single band gap energy

1-Sun irradiance

One  $e-h$  pair per photon

No use of photon with  $E < E_{gap}$

# Limitations

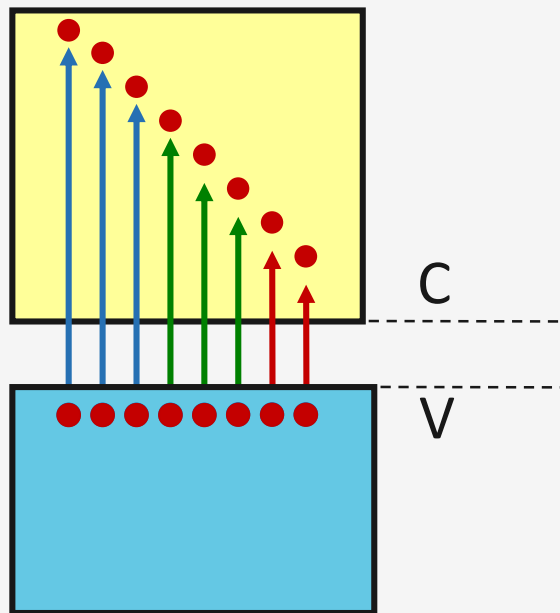

Single band gap energy

1-Sun irradiance

One  $e-h$  pair per photon

No use of photon with  $E < E_{gap}$

Single population of  $e$  and  $h$

# Limitations

Single bang gap energy

1-Sun irradiance

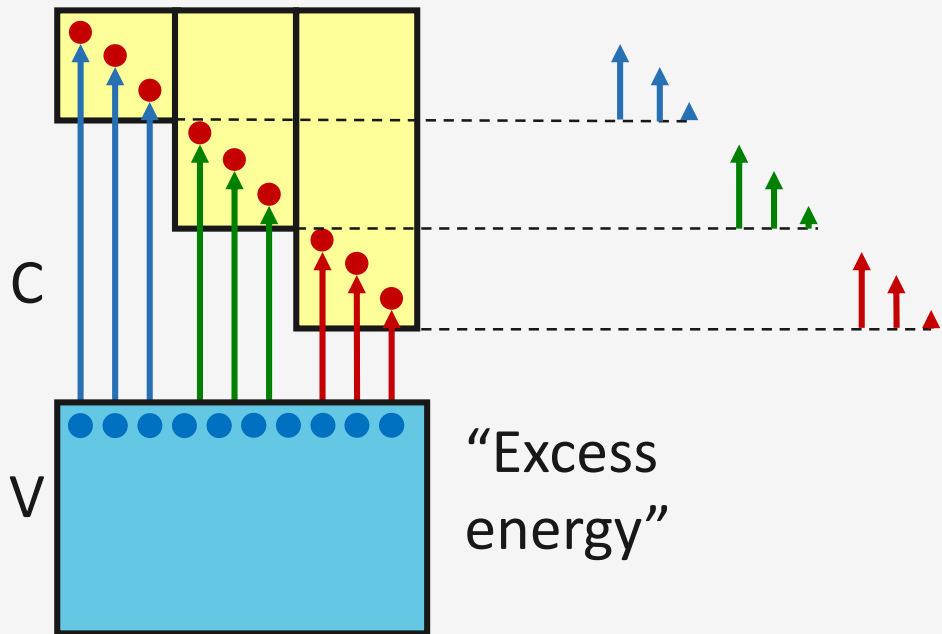

One  $e-h$  pair per photon

No use of photon with  $E < E_{gap}$

Single population of  $e$  and  $h$

# Opportunities

# Multijunction

# Limitations

Single band gap energy

1-Sun irradiance

One  $e-h$  pair per photon

No use of photon with  $E < E_{gap}$

Single population of  $e$  and  $h$

# Opportunities

Multijunction

Concentrator Solar Cells

# Limitations

Single band gap energy

1-Sun irradiance

One  $e-h$  pair per photon

No use of photon with  $E < E_{gap}$

Single population of  $e$  and  $h$

# Opportunities

Multijunction

Concentrator Solar Cells

Down Conversion

Multiple Exciton Generation

# Limitations

Single band gap energy

1-Sun irradiance

One  $e-h$  pair per photon

No use of photon with  $E < E_{gap}$

Single population of  $e$  and  $h$

# Opportunities

Multijunction

Concentrator Solar Cells

Down Conversion

Multiple Exciton Generation

Up Conversion

# Limitations

Single bang gap energy

1-Sun irradiance

One  $e$ - $h$  pair per photon

No use of photon with  $E < E_{gap}$

Single population of  $e$  and  $h$

# Opportunities

Multijunction

Concentrator Solar Cells

Down Conversion

Multiple Exciton Generation

Up Conversion

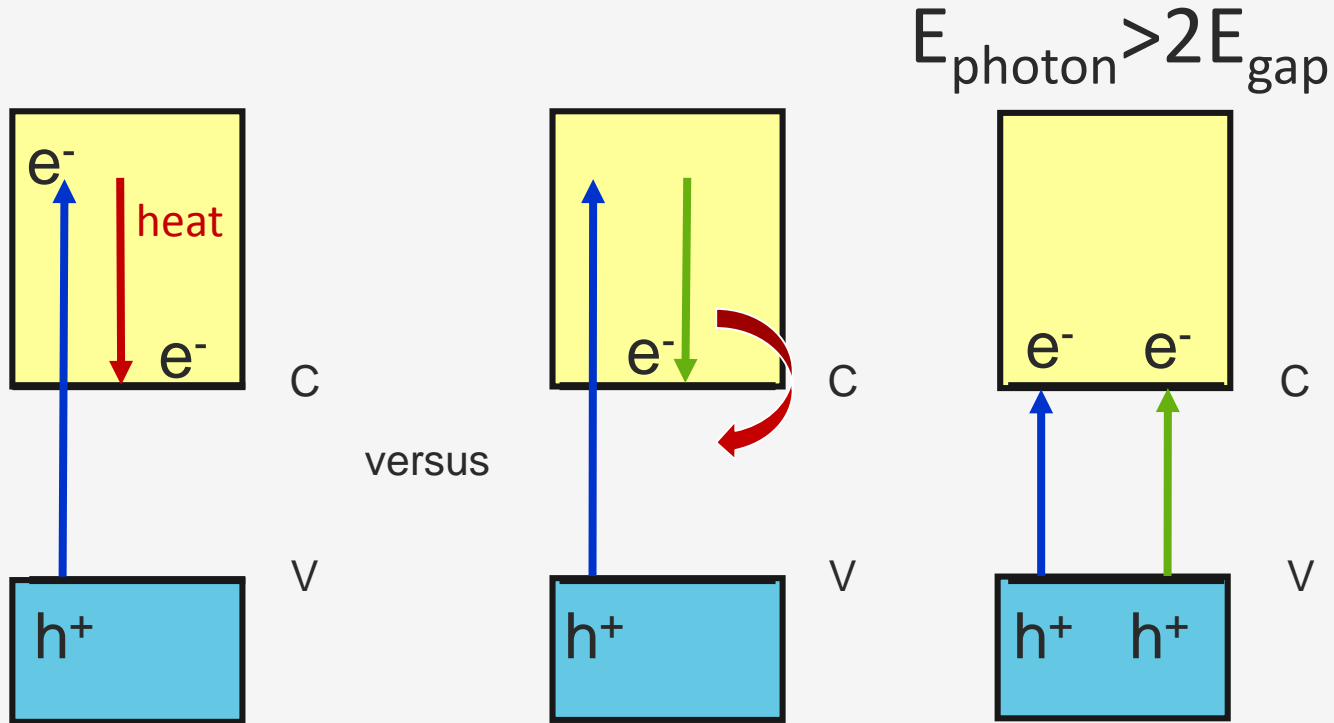

Intermediate Band Solar Cells

Hot Carrier Solar Cells

# Opportunity: *down conversion*

# Opportunity: *Multiple Exciton Generation*

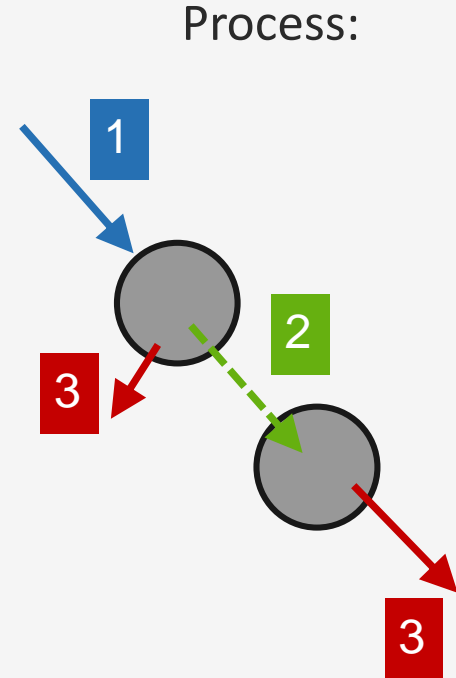

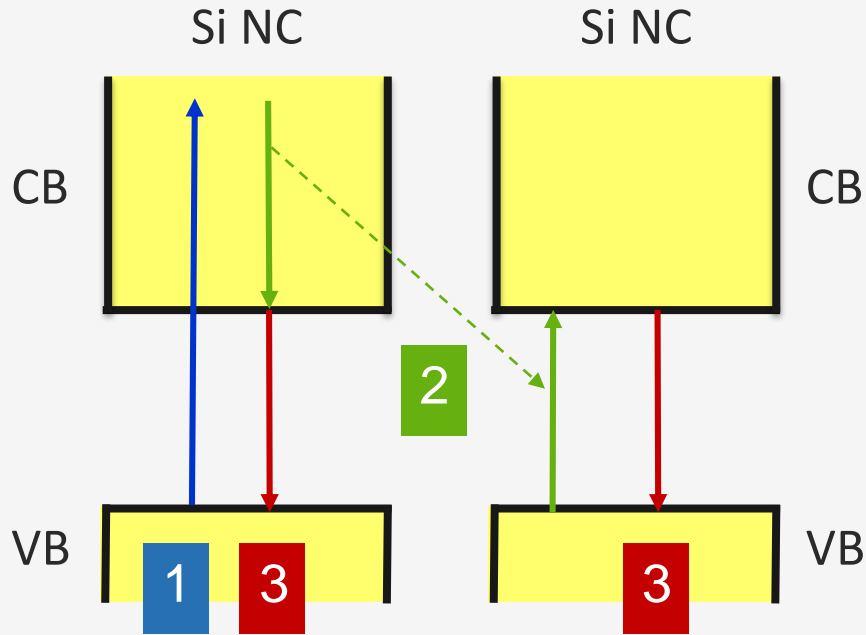

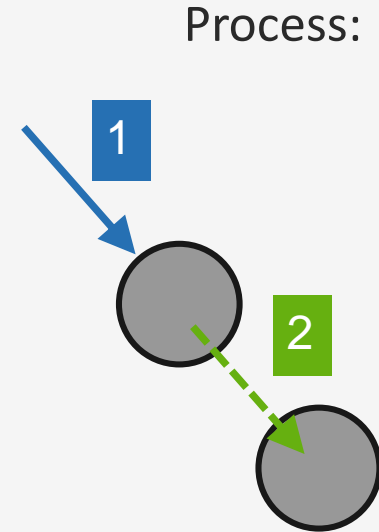

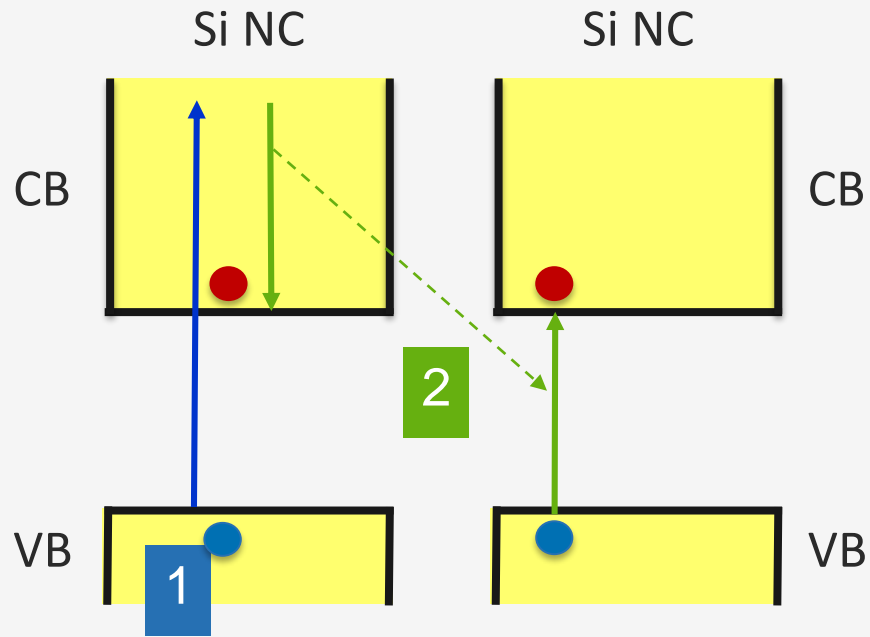

# Quantum Dots

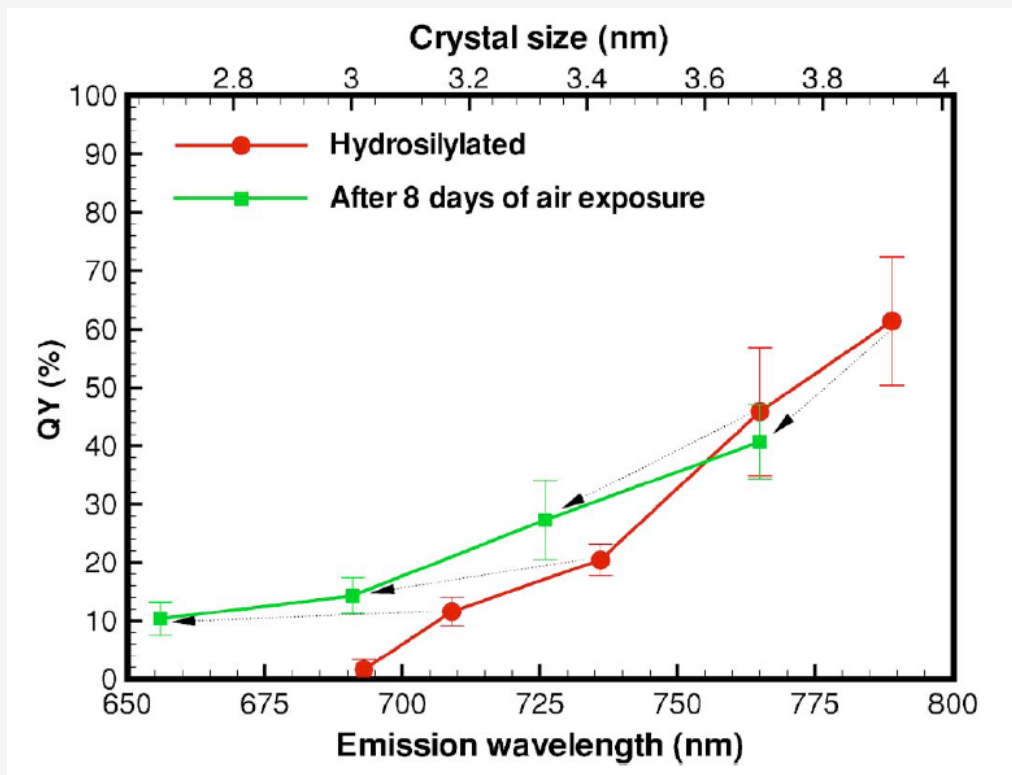

# Down conversion: *based on QDs*

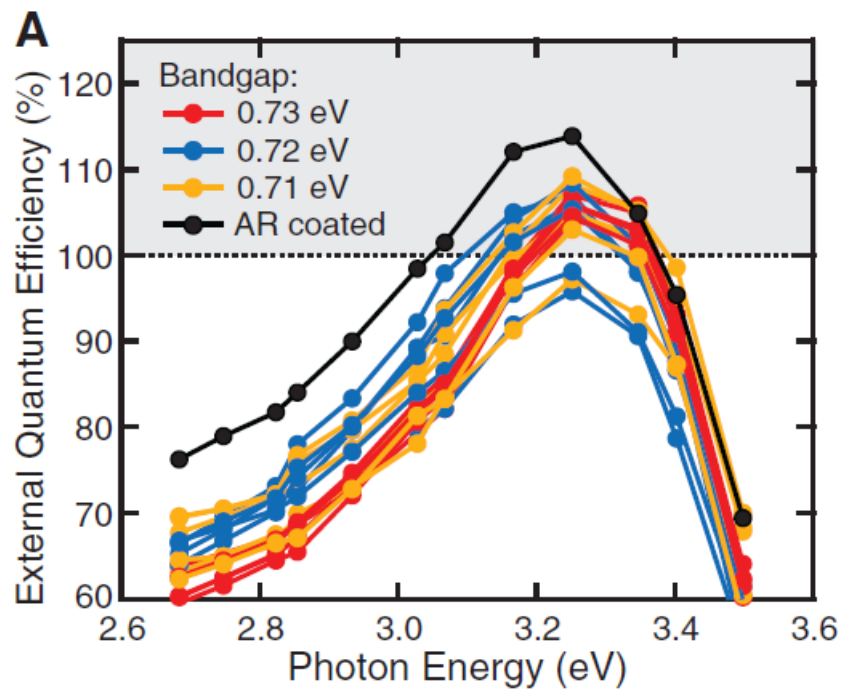

# Down conversion: *based on QDs*

# Down Conversion in QDs structures

# Multiple Exciton Generation in QDs structures

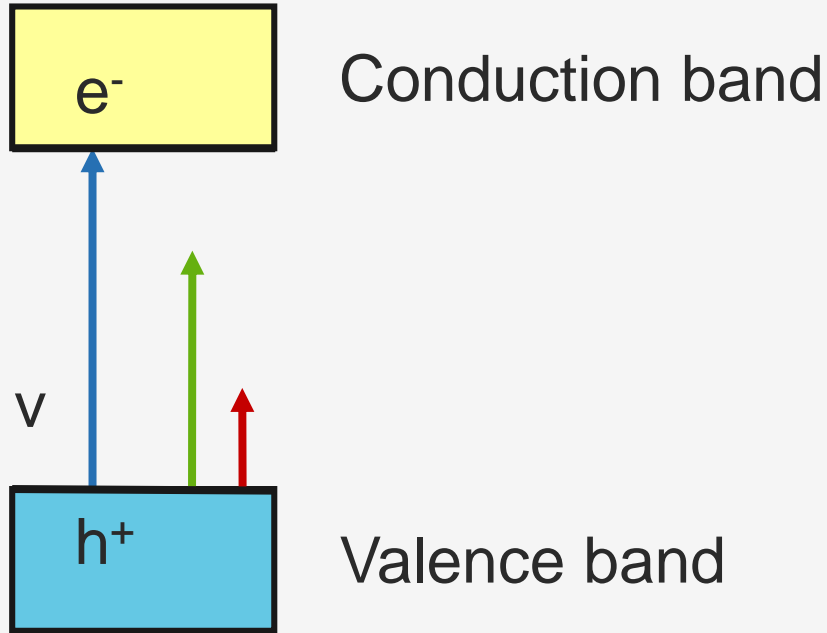

*Semonin et al., Science 334, 1530 (2011).*

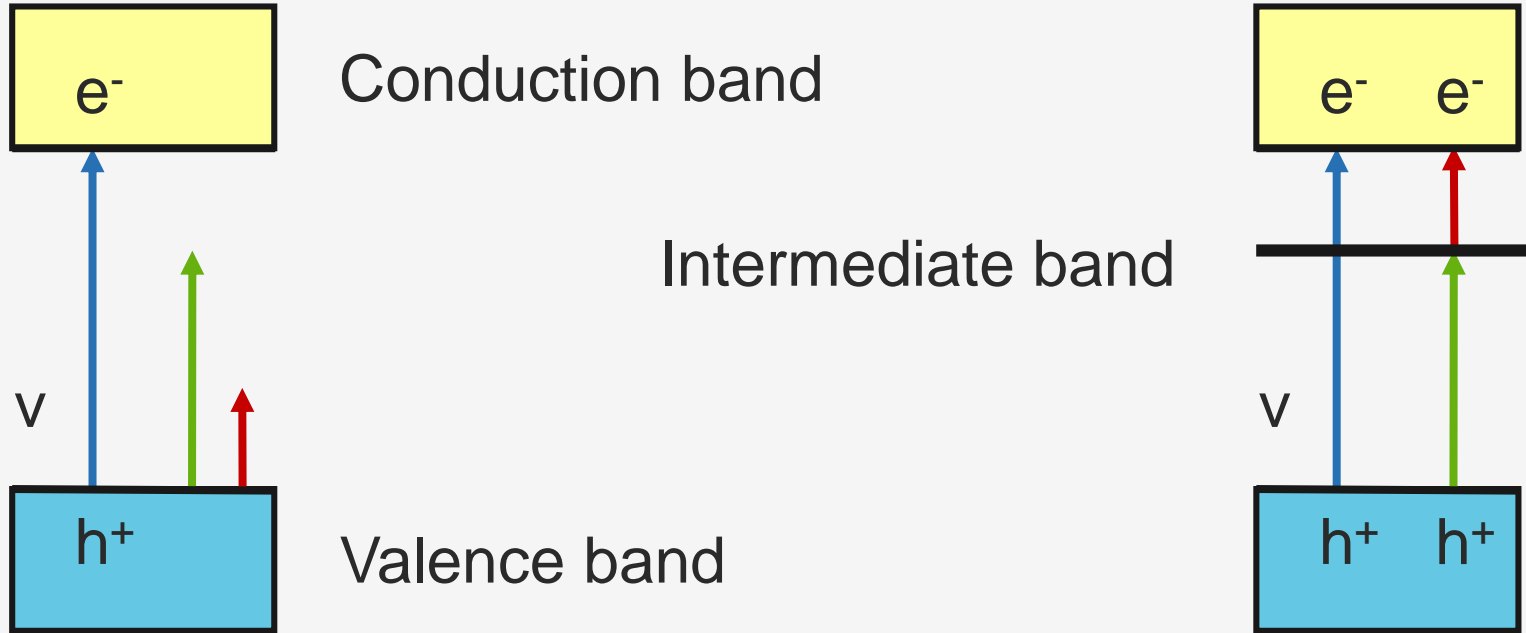

# Opportunity: *up conversion*

# Opportunity: *intermediate band solar cell*

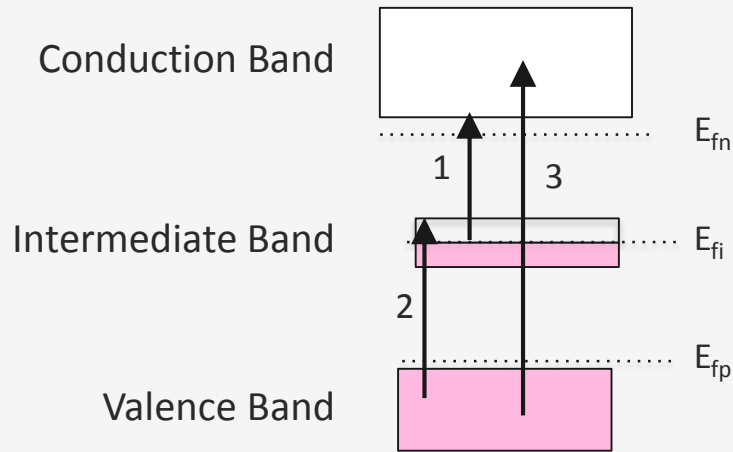

# Opportunity: *intermediate band solar cell*

# Opportunity: *Intermediate band solar cells*

metallic

Built-in field

Band-edge engineering

# Opportunity: *Intermediate band solar cells*

# Hot Carrier Solar Cell

hot **electron** and **hole**  
Energy distributions

# Hot Carrier Solar Cell

# Hot Carrier Solar Cell

# Hot Carrier Solar Cell

# Hot Carrier Solar Cell
